Biodiversity Global Issues

The variety of life on Earth, its biological diversity is commonly referred to as biodiversity. The number of species of plants, animals, and microorganisms, the enormous diversity of genes in these species, the different ecosystems on the planet, such as deserts, rainforests and coral reefs are all part of a biologically diverse Earth.

Biodiversity BC

BC is Special. Compared to much of the world, B.C. continues to enjoy an abundance of natural diversity. The variety and richness of our landscapes, ecosystems and species - that is our biodiversity - produce a wide range of ecological "goods and services" such as clean air and water, food, medicine, productive soils, fibre, regulation of local
