Continuous Bounded Cohomology of Locally Compact Groups

This monograph introduces the functorial study of the continuous bounded cohomology for topological groups, with coefficients in Banach modules. The powerful techniques of this more general theory have successfully solved a number of the original problems in bounded cohomology. As applications, one obtains, in particular, rigidity results for actions on the circle, for representations on

APPLICATIONS TO RIGIDITY THEORY M. Burger and N. Monod Introduction and Statement of the Results We present a theory of continuous bounded cohomology of locally compact groups with coefficients in Banach modules. A central role is played by amenable actions, as they give rise to relatively injective resolutions. Further, An invitation to bounded cohomology - EGG a locally compact group we (ab)use the same notations  $H^*$ ,  $H_b^*$  for the continuous (bounded) cohomology; for present purposes, it is simply defined by requiring that A useful formula from bounded cohomology - ETH Z A USEFUL FORMULA FROM BOUNDED COHOMOLOGY Marc Burger & Alessandra Iozzi E S S eminaires & Congrès 18, 2008, p. 245-294 A USEFUL FORMULA FROM BOUNDED COHOMOLOGY by Marc Burger & Alessandra Iozzi Abstract. We give a pointed overview of the foundation of the homological algebra approach to continuous bounded cohomology for locally compact groups, which allows us to prove an integral

Bounded cohomology and applications - ETH Z Bounded cohomology and applications: a panorama Marc Burger Bounded cohomology for groups and spaces is related to usual cohomology and in fact enriches it by providing stronger invariants. The aim of this talk is to illustrate certain aspects of this philosophy. General references for bounded cohomology are [12, 21, 22, 3]. 1. Definition, low degrees.
