Evaluation of a Family Systems Intervention for Managing ...

Family systems play a crucial, albeit complex, role in pediatric chronic illness. Unfortunately, very few psychosocial interventions are available to help these stressed families navigate the developmental steps of chronic illness. A new intervention (MEND) addresses the needs of these families and applies to a broad range of chronic illnesses. This article presents this family systems intervention as well as includes preliminary program evaluation data on 22 families that graduated from the Psychosocial Family Interventions in Chronic Pediatric Illness

Description. The symposium "Family Dynamics, Family Therapy, and Pediatric Medical Illness," held at Downstate Medical Center on December 12 and 13, 1980, considered the impact of life-threatening illness in children and adolescents on intrafamilial dynamics.
