Can laboratory toxicity tests explain the pattern of field The responses of soil algae, vascular plants, and invertebrates to soils collected along a toxicity gradient of post-mining sites were measured in laboratory toxicity tests, and the responses were compared with field pattern of communities of these organisms along this gradient. Can laboratory toxicity tests explain the pattern of field

Can laboratory toxicity tests explain the pattern of field communities of algae, plants, and invertebrates along a toxicity gradient of post-mining sites? (PDF) The cave crickets of northeast Turkey and ... Until now, of the total 53 or so species of cave crickets in the genera *Troglophilus* Krauss, 1879 and *Dolichopoda* Bolivar, 1899, seven are known from Turkey. Morphological and genetic distinctiveness of metallicolous ...

Patterns of morphological, genetic and epigenetic variation (DNA methylation pattern) were investigated in metallicolous (M) and non-metallicolous (NM) populations of *Armeria maritima*. A morphological study was carried out using plants from six
